"PENN'S THICK" IS RICH AND FRUITY

This Delicious Chew Has the Natural Flavor of Choice-est Burley Leaf

THE WORLD'S BEST PLUG

If you don't chew tobacco you simply cannot get the full measure of enjoyment out of it.
A good chew, with its juicy richness and appetizing flavor is an aid to digestion. That means it's beneficial to the whole system. And the best chew is plug tobacco, the closest-to-nature form into which tobacco leaf can be made.
Nature's own sweetness is in every juicy chew of Penn's Thick. You never before tasted such mellow richness—you can't get so much delicious, natural flavor out of any other chew.
The rich leaf for Penn's Thick is selected, reselected, picked over by hand, stemmed by hand, pressed into pure, luscious, golden-brown plugs by the most wholesome, pure-food methods.
Penn's is guaranteed to be the best Natural Leaf Tobacco made. Any dissatisfied customer can return it to any merchant, whom we hereby authorize to refund the money. Sold in 10c cuts.

Got Rid of My Corns With Magic "Gets-It"

Simplest Corn Cure in the World—No Pain, No Fuss. New, Sure Way.

Why Have Corns At All When "Gets-It" Removes Them the New, Dead-Sure Way? salves, and tapes, bandages, and plasters that make corns pop-eyed have only made your corns grow faster, just hold your heart a moment and figure this: Put two drops of "Gets-It" on the corn. It dries at once. You can put your shoe and stocking on right over it. The corn is doomed. It makes the corn come off clear and clean. It's the new, easy way. Nothing to stick or press on the corn. You can wear smaller shoes. You'll be a joy-walker. No pain, no trouble. Accept no substitutes. "Gets-It" is sold by druggists everywhere, 25c a bottle, or sent direct by E. Lawrence & Co., Chicago, Ill.

MINES AND MINING

It is practically certain that the Indian Queen of Beaver county, Utah, will resume work this spring, according to one of the directors of the company.
Refining capacity of the American Smelting & Refining company continues fully occupied, the plants turning out about 30,000 tons of refined copper a month.
President Harker, of the Lynn Big Six located in Eureka county, Nev., says that he is in receipt of reports that a body of gold ore has been opened in the west drift.
Reports received the past week from the Pittsburgh-Idaho are that the gold ore vein opened from the Silver Dollar level has been proven at points for 250 feet along the fissure.
Park City, Utah, will soon get a zinc smelter to cost \$300,000 to \$400,000. The financing will be done by the Daly-Judge Mining company through the increase of its capital stock.
Colorado's present cash treasury is variously estimated from \$25,000 up to \$50,000. Colorado has paid out in all \$2,600,000, or \$2.60 a share. The last dividend was distributed March 15, 1913.
Last month Anaconda produced 23,300,000 pounds copper against 23,200,000 in January, and 25,600,000 in December, the high mark in 1915. In January last year the production was 16,100,000 pounds.
Director of the Silver King Consolidated Mining company at Park City, Utah, last week, announced the regular quarterly dividend of 10 cents a share. The previous total dividends amounted to \$814,356.
Shipments of ore from the mines of Tintic the past week totaled 120 carloads estimated at 6,000 tons, or valued at \$150,000. This is compared with 146 cars the previous week, which was the heaviest weekly production in a long time.
The production for the month of February from the mines of the Cripple Creek, Colo., as reported out from the several treatment plants has totaled 77,630 tons, with an average value of \$14.45 per ton and a gross bullion value of \$1,121,514.50.
There was exported from the United States during the year 1915 a total of 682,000,000 pounds of copper, according to government data just completed for the period, representing a drop of 160,000,000 pounds from the previous year, says a Boston newspaper.
After having secured an option on 750,000 shares of the Beaver Copper Mining company's stock, Tintic people appointed A. J. McMullen of Salt Lake superintendent and Lewis Merriman managing director. A shaft will be sunk at once on the property in Beaver Lake district.
Neither the Giroux company nor the Consolidated Copper Mines company, which controls it, have shown any particular activity for the past year or more, and yet the last quarterly statement of the Giroux shows a profit of nearly \$24,000, which was received from ore taken from its ground by the Nevada Consolidated, and treated at McGill, Nevada.
Superintendent Oden of the Wilbert Mining company writes to the Salt Lake headquarters that the mine near Aroo is in as good physical shape as at any time in its history. He has approximately 250 tons filling the ore bins, which are somewhat congested on account of rather bad roads. The bins have a capacity of 300 to 350 tons.
A story so old that it became a legend has led to the rediscovery, after fifty years, of a valuable deposit of mercury near Canyon City, Ore., once the glory of the mining country. After half a century of idleness, mercury deposits in Chinabur mountain, thought to have run out in the sixties, have been rediscovered by Ralph M. Curl of Canyon City, because he believed the legend.
There is a demand in the market which in the aggregate would total fully 20,000,000 pounds of copper for shipment to Europe, according to copper producers in receipt of the inquiries. These demands have been coming in through unheard of and most unusual sources, indicating that in their endeavors to get the metal some of the foreign consumers have been using all possible channels through which to place their orders.
Revolutionizing the smelting of zinc ores and zinc concentrates, the American Smelting & Refining company intends to make the zinc smelting industry a central industry of the intermountain country instead of shipping the concentrates to the gas fields of Pennsylvania, Kansas, Ohio and West Virginia. For months a series of experiments have been conducted at the Murray and Anaconda smelters to determine if electricity could be substituted for natural gas, and the company has decided that with proper rates for power the new process is superior to the old in that it saves a greater amount of zinc.
Annual report of Eagle & Blue Bell Mining company shows net earnings of \$143,345, an increase of \$21,809 over the previous year. Company produced 8,275,734 pounds of lead, 3,806 pounds of copper, 441,263 ounces of silver and 1,228 ounces of gold. Two dividends of 10 cents each were paid last year, calling for \$133,971.
Utah Copper company has declared its regular quarterly dividend of \$1.50 and \$1 extra. Chino Copper declared a dividend of \$1.25 a share. Butte & Superior declared a dividend of 75 cents and \$10 extra.

FAY NEWS

FAY, Nevada, March 14—The snow of the high mountains has been rapidly melting during our warm spell and now the water is very high in the canyons.
Mrs. E. R. Sturte, a niece of William Rafferty, and who has been a visitor in Fay for the past few months, is reported to have entirely regained her health during her stay with us, and has returned to her home in Lewiston, Idaho.
A party of Fay young folks enjoyed a wonderful afternoon Sunday, tramping over the hills and taking in points of interest. It is a very real treat to get back to terra firma once more after our siege of snow.
William Brown has been visiting in Rose valley for a few days.

NOTICE OF APPLICATION FOR
Permission to appropriate the Public Waters of the State of Nevada.
Application No. 3825.
Notice is hereby given that on the 6th day of March, 1916, in accordance with Section 59, Chapter 140, of the Statutes of 1913, one George C. Stowell of Alamo, County of Lincoln, and State of Nevada, made application to the State Engineer of Nevada for permission to appropriate the public waters of the State of Nevada. Such appropriation is to be made from Tule Springs or Hells half Acre spring, at NW 1-4 of SE 1-4 of Sec. 33, T. 5 S.R. 61 E., M. D. B. & M., by means of pipes and open cuts, and 1-10th of one cubic foot per second is to be conveyed to the NW 1-4 of SE 1-4 of Sec. 33, T. 5 S.R. 61 E., M. D. B. & M., by means of pipes, open cuts and troughs and there used for stock and domestic purposes. Water not to be returned to stream.
Signed: W. M. KEARNEY,
State Engineer.
First publication March 18, 1916.
Last publication May 15, 1916.

NOTICE OF APPLICATION FOR
Permission to appropriate the Public Waters of the State of Nevada.
Application No. 3788.
Notice is hereby given that on the 1st day of February, 1916, in accordance with Section 59, Chapter 140 of the Statutes of 1913, W. H. Korns, Ben C. Granger, S. W. West and William Lamb, of Salt Lake City, County of Salt Lake, and State of Utah, made application to the State Engineer of Nevada for permission to appropriate the public waters of the State of Nevada. Such appropriation is to be made from Maynard Lake and tributaries, flood and unappropriated waters, at a point in Pahrana-gat Wash, 315 rods South and 105 rods East of the SE corner of Sec. 33, T. 8 S.R. 62 E., M. D. B. & M., unsurveyed, by means of reservoir and dam, and 16,000 acre feet per annum is to be conveyed to Sections and portions of Sections 1, 2, 11, 12, 13, 14, 23, and 24, T. 10 S.R. 62 E., M. D. B. & M., by means of open cuts ditches and laterals and there used for irrigation and domestic purposes from April until October of each year. Water not to be returned to stream.
Signed: W. M. KEARNEY,
State Engineer.
